RE: Sewerage Commission – Oroville Region Wastewater Rate Study

Bartle Wells Associates is pleased to submit the Wastewater Rate Study. The study develops long-term financial projections and calculates wastewater rates designed to equitably recover the costs of providing service. The recommended rates are designed to meet SC-OR's operational and capital funding needs, comply with legal requirements, and be fair to all customers.

The proposed rates incorporate overall rate increases needed to maintain the wastewater enterprise's financial stability and meet future funding needs. An option to change the rates to reflect flow differentials between residential customer classes (Single Family, Multi-Family, and Mobile Home) is included. Rate increases are phased in over five years, with consistent annual increases.

We enjoyed working with SC-OR on this assignment and appreciate the ongoing assistance and input received throughout the project. Please contact us anytime if you have questions about the recommendations in this report or other related issues.

Sincerely,

BARTLE WELLS ASSOCIATES

1. Executive Summary

Purpose

The Sewerage Commission – Oroville Region (SC-OR) retained Bartle Wells Associates ("BWA") to develop a financial plan and cost of service study for SC-OR's wastewater rates to ensure financial stability over the next five years (FY 2023/24 to FY 2027/28).

SC-OR operates and maintains the Oroville area wastewater treatment plant under the authority of a Joint Powers Agreement between the City of Oroville (City), Lake Oroville Area Public Utility District (LOAPUD) and Thermalito Water and Sewer District (TWSD). The City, LOAPUD and TWSD bill wastewater customers for the cost of operating and maintaining the wastewater treatment plant and the cost of operating and maintaining each entity's wastewater collection system. There are currently over 18,000 equivalent dwelling units (EDUs) connected to SC-OR's wastewater treatment plant.

Legal Authority

The statutory authority for levying wastewater rates is included in Health and Safety Code section 5471 which states: "...any entity shall have power, by an ordinance or resolution approved by a two-thirds vote of the members of the legislative body thereof, to prescribe, revise and collect, fees, tolls, rates, rentals, or other charges for services and facilities furnished by it, either within or without its territorial limits, in connection with its water, sanitation, storm drainage, or sewerage system."

(California Health and Safety Code 5471)

Proposition 218

Proposition 218, the "Right to Vote on Taxes Act", was approved by California voters in November 1996 and is codified as Articles XIIIC and XIIID of the California Constitution. Proposition 218 establishes requirements for imposing any new or increasing any existing property-related fees and charges.

SC-OR tributary agencies must follow the procedural requirements of Proposition 218 for all wastewater rate increases. These requirements include:

1. Noticing Requirement: SC-OR tributary agencies must mail a notice of the proposed rate increases to all affected property owners. The notice must specify the amount of the fee, the basis upon which it was calculated, the reason for the fee, and the date/time/location of a public rate hearing at which the proposed rates will be considered/adopted.

- **2. Public Hearing:** SC-OR tributary agencies must hold a public hearing prior to adopting the proposed rate increases. The hearing must be held not less than 45 days after the required notices are mailed.
- **3. Rate Increases Subject to Majority Protest:** At the public hearing, the proposed rate increases are subject to majority protest. If more than 50% of affected property owners submit written protests against the proposed rate increases, the increases cannot be adopted.

Proposition 218 also established several substantive requirements that apply to wastewater rates and charges, including:

- 1. Cost of Service: Revenues derived from the fee or charge cannot exceed the funds required to provide the service. In essence, fees cannot exceed the "cost of service." Agencies may carry a prudent level of reserves and save cash for future projects or emergencies.
- **2. Intended Purpose:** Revenues derived from the fee or charge can only be used for the purpose for which the fee was imposed.
- **3. Proportional Cost Recovery**: The amount of the fee or charge levied on any customer shall not exceed the proportional cost of service attributable to that customer.
- **4. Availability of Service**: No fee or charge may be imposed for a service unless that service is used by, or immediately available to, the owner of the property.
- **5. General Government Services:** No fee or charge may be imposed for general governmental services where the service is available to the public at large.

Charges for water, wastewater, and refuse collection are exempt from additional voting requirements of Proposition 218, provided the charges do not exceed the cost of providing service and are adopted pursuant to procedural requirements of Proposition 218.

2. Current Wastewater Rates

Table 1 shows SC-OR's current monthly wastewater rates. SC-OR's last rate increase went into effect July 1, 2022, and there is one final adopted increase approved for July 1, 2023. All customers – residential and commercial – are billed a flat rate per equivalent dwelling unit (EDU).

Table 1
Sewerage-Commission, Oroville Region
Current and Approved Wastewater Rates

		Approved
	(7/1/2022)	(7/1/2023)
	\$/Dwelling	\$/Dwelling
All Users	Unit/Month	Unit/Month
Sewerage-Commission, Oroville Region	\$19.85	\$23.85
% Increase		20.2%

3. Wastewater Financial Plan

BWA developed a 5-year financial plan for SC-OR's wastewater enterprise designed to fund operating and capital needs, maintain adequate fund reserves, and meet debt service coverage requirements. The financial plan serves as a roadmap for funding operating and capital programs and maintaining long-term financial health and determines the revenue requirement for the wastewater rates.

Outstanding Debt Service

SC-OR does not have any existing outstanding debt.

Capital Improvement Program

SC-OR's capital improvement program primarily consists of an upgrade to its current wastewater treatment plant. The projected capital cost for the project amounts to \$44.5 MM. Projections assume the wastewater treatment plan will be funded through a \$38 MM bond issuance (4% interest, 30 years, 1.5% transaction costs). The remainder of the projected is estimated to be funded through District reserves.

Operating Expenses

Table 2 shows SC-OR's operating expenses. Operating costs are escalated by 7.5% per year for most items based on estimated cost inflation and potential additional operating costs from the treatment plant upgrade project. Cost inflation was estimated based on input from agency staff.

Revenue and Fund Reserve Estimates

Table 3 provides estimates of cash reserves balances and rate revenue. The District generates approximately \$4.45 MM of service charge revenue from 18,684 EDUs and \$85,000 from septic tank pumpers. Projected interest on funds is 0.92%. The District separates its funds into several restricted fund categories including: the Replacement Fund (WCRF), Regulatory and Capital Account, and Capital Outlay. Total unrestricted funds amounted to approximately \$5.4 MM as of July 1, 2022, and total cash reserves amounted to \$16.8 MM.

Wastewater Cash Flow Projection

Table 4 shows the wastewater cash flow projection. BWA projects that a wastewater rate increase of 20.15% is required for the first fiscal year (FY 2023/24) and 5% for the following four years (FY 2024/25 through FY 2027/28) to meet SC-OR's wastewater expenses. Projections estimate 1% annual growth in SC-OR's customer base beginning FY 2024/25.

Chart A shows a graphical presentation of the 5-year financial projections. Rate revenue increases are needed to cover projected wastewater treatment plant upgrade related debt service.

4. Wastewater Rates Derivation

Reduced Equivalent Dwelling Unit Calculation for Residential Categories

BWA calculated a reduced wastewater rate for multi-family units and mobile homes due to those accounts having on average less people per unit than a single-family residence, and therefore less flow. An equivalent dwelling unit (EDU) represents the amount of wastewater generated by a typical single-family residence. Table 5 defines the estimated flow and loadings per EDU.

Table 5
Sewerage-Commission, Oroville Region
Equivalent Dwelling Unit Flow & Loadings (Resolution 04-08)

Daily Flow	260 Gallons
Monthly Flow	7,908 Gallons
Peak Daily Flow Inc. I&I	1,040 Gallons
B. O. D.	0.299 Lbs/Day
Total Suspended Solids	0.327 Lbs/Day
Oils & Grease	0.065 Lbs./Day
B. O. D.	138 mg/l
Total Suspended Solids	151 mg/l
Oils & Grease	30 mg/l
Proration of Capital Cost on Flow Basis	53.90%
Proration of Capital Cost on B.O.D. Basis	33.50%
Proration of Capital Cost on T.S.S. Basis	10.70%
Proration of Capital Cost on Oils Basis	1.90%

Used in the calculation of Regional Facility Charges, Infiltration/Inflow Surcharges, and the equating of industrial discharges into Equivalent Dwelling Units.

In Table 6, BWA applied the EDU formula from Table 5 and the estimated flow per unit for each residential customer category based on the proportion of people per unit from regional census data (reference Appendix A). Table 6 estimates the number of EDUs for a multi-family unit, mobile home, and single-family residence.

Table 6
Sewerage-Commission, Oroville Region
Residential Equivalent Dwelling Unit Calculation

	% EDU Weighting	Single Family	Multi Family	Mobile Home
Flow (GPD)	53.90%	260	202	188
BOD (mg/l)	33.50%	138	138	138
TSS (mg/l)	10.70%	151	151	151
Oils & Grease (mg/l)	<u>1.90%</u> 100.00%	30	30	30
Calculated EDU*		1	0.880	0.850

^{*}EDU Formula = 0.539*Flow(GPD)/260 + 0.335*(BOD mg/l)/138 + 0.107*(TSS mg/l)/151+ .019*(Oil & Grease mg/l)/30

Table 7 calculates reduced rates for multi-family residences and mobile homes using the proposed EDUs calculated in Table 6.

Table 7
